Monthly Financial Reports

and

Customer Collaborative

Customer Collaborative Financial Overview for FY 2012 through September 30, 2012

Agency

- Audited FCRPS Net Revenues for FY 2012 are \$87 million. FY 2012 was the second year in a row to produce positive net revenues. Combined Power and Transmission net revenue is \$128 million.
- The Rate Case forecast was \$64 million and the Start-of-Year forecast was \$106 million. The 3rd Quarter Review forecast was \$107 million.
 - Net Revenues are \$23 million over the rate case forecast.
- Cash Reserves ended at a level of \$1,022 million, a increase of \$16 million from last year. Reserves available for risk were \$704 million.
- BPA spent \$953 million on capital projects in FY 2012. This includes projects for Federal Hydro system replacements, transmission expansion and replacements, energy efficiency, fish and wildlife, and information technology projects.
 - Energy Efficiency capital spending came in \$24 million below the rate case getting back on track to stay within the 5 year Power Plan budget of \$459 million.

Power Services

- Power Services actual Net Revenues for FY 2012 are \$39 million.
 - Operating Revenues for FY 2012 are \$2,631 million.
 - Total expenses (operating expenses and net interest) for FY 2012 are \$2,592 million.
- Power's Net Revenue forecast for the Rate Case was \$53 million and at Start-of-Year was \$63 million. The 3rd Quarter Review forecast was \$54 million.
- Power Services net revenues were \$14 million less than the rate case forecast.
 - Despite higher than expected streamflows, revenues (total revenues less power purchases and transmission acquisition) in FY 2012 came in \$128 million below the rate case forecast. The primary drivers were:
 - Net Secondary revenues were \$52 million below rate case, due to a lower market price environment.
 - Lower preference loads than expected reduced load shaping and demand revenues by a total of \$19 million.
 - 4(h)(10)(C) credit was lower by \$14 million because of the above-average water year and lower market prices resulting in less replacement power purchase costs than the rate case.
 - Transmission acquisition costs came in \$23 million higher than the rate case as a result of the above-average water year.
 - Power Services was able to keep expenses (total costs excluding power purchases and transmission acquisition) \$113 million below the rate case forecast.
 - By proactively managing costs throughout the year, internal operating costs were \$9 million below the rate case.
 - Net interest costs were \$39 million less primarily due to the \$16 million accrual of interest expected to be received from the California PX and the \$14 million reclassification of the Cougar Dam water intake tower.
 - Columbia Generating Station costs were \$14 million less than forecast due to use of unrestricted funds from the DOE spent fuel storage settlement and reduced decommissioning trust fund contributions related to the license extension.
 - The Bureau of Reclamation came in \$23 million below the rate case forecast primarily due to under-execution in non-routine extraordinary maintenance and reprogramming some work into FY 2013. The Corps of Engineers came in \$2M below the rate case forecast.
 - Fish and Wildlife spending came in \$5 million over the rate case forecast (which is less than 2% of the program size), but proactive budget management efforts minimized this overspending. Furthermore, FY 2013 Fish and Wildlife budgets will be reduced to maintain the rate period spending level as committed to customers.

Customer Collaborative Financial Overview for FY 2012 through September 30, 2012

Transmission Services

- Transmission Services Net Revenues for FY 2012 are \$89 million.
 - Actual Revenues for FY 2012 are \$965 million.
 - Actual Total Expense (operating expenses and net interest) for FY 2012 are \$876 million.
- The Net Revenue Rate Case forecast was \$57 million and the Start-of-Year forecast was \$88 million. The 3rd Quarter Review forecast was \$97 million.
- Transmission Services exceeded expectations with net revenues coming in \$32 million over the rate case forecast.
 - Revenues were \$17 million higher than the rate case mainly due to higher than expected reimbursable revenues due to the Grand Coulee 500kV Cable replacement project and higher Generation Integration Persistent Deviation penalties.
 - Lower spending, \$14 million, was primarily driven by lower interest expense reflecting lower than expected capital spending and lower than expected interest rates on borrowings. These savings were partially offset by unexpected software write-offs and settlement payments.

- <1 For BPA management reports, Gross Sales and Purchase Power are shown separated from the power bookout adjustment (EITF 03-11, effective as of Oct 1, 2003) to provide a better picture of our gross sales and purchase power.</p>
- <2 Although the forecasts in this report are presented as point estimates, BPA operates a hydro-based system that encounters much uncertainty regarding water supply and wholesale market prices. These uncertainties among other factors may result in large range swings +/- impacting the final results in revenues, expenses, and cash reserves.</p>
- <3 The consolidated FCRPS Statement reduces reported Revenues and Expenses where between business line transactions occur, the most significant of which are for Transmission Acquisition and Ancillary Services.</p>
- <4 Beginning in FY 2004, consolidated actuals reflect the inclusion of transactions associated with a Variable Interest Entity (VIES), which is in accordance with the FASB Interpretation No. 46 (FIN 46) that is effective as of December, 2003.</p>
- <5 The Residential Exchange Program expenses reflect the Scheduled Amount of REP benefits payments established in the 2012 REP Settlement Agreement. The Scheduled Amount of REP benefit payments incorporates a \$76,537,617 reduction in REP benefits to provide Refund Amount payments to COUs. The Refund Amount returned to the COUs is reflected through a reduction in the Gross Sales amount.</p>

<1 Although the forecasts in this report are presented as point estimates, BPA operates a hydro-based system that encounters much uncertainty regarding water supply and wholesale market prices. These uncertainties, among other factors, may result in large range swings +/- impacting the final results in revenues, expenses, and cash reserves.</p>

<2 Beginning in FY 2004, consolidated actuals reflect the inclusion of transactions associated with a Variable Interest Entity (VIES), which is in accordance with the FASB Interpretation No. 46 (FIN 46) that is effective as of December, 2003.</p>

<1 For BPA management reports, Gross Sales and Purchase Power are shown separated from the power bookout adjustment (EITF 03-11, effective as of Oct 1, 2003) to provide a better picture of our gross sales and gross purchase power.</p>

<2 Although the forecasts in this report are presented as point estimates, BPA operates a hydro-based system that encounters much uncertainty regarding water supply and wholesale market prices.</p>
These uncertainties among other factors may result in large range swings +/- impacting the final results in revenues, expenses, and cash reserves.

<3 The Residential Exchange Program expenses reflect the Scheduled Amount of REP benefits payments established in the 2012 REP Settlement Agreement. The Scheduled Amount of REP benefit payments incorporates a \$76,537,617 reduction in REP benefits to provide Refund Amount payments to COUs. The Refund Amount returned to the COUs is reflected through a reduction in the Gross Sales amount</p>

This is an "accounting only" (no cash impact) adjustment representing the mark-to-market (MTM) adjustment required by ASC 815, Derivatives and Hedging (formerly SFAS 133), for identified derivative instruments. In FY2010, BPA began applying ASC 980, Regulated Operations, treating the unrealized gains and losses on derivative instruments as Regulatory Assets and Liabilities.

<1 Although the forecasts in this report are presented as point estimates, BPA operates a hydro-based system that encounters much uncertainty regarding water supply and wholesale market prices. These uncertainties, among other factors, may result in large range swings +/- impacting the final results in revenues, expenses, and cash reserves.</p>

Run Date/Time: October 15, 2012 06:29

<2 Beginning in FY 2004, consolidated actuals reflect the inclusion of transactions associated with a Variable Interest Entity (VIES), which is in accordance with the FASB Interpretation No. 46 (FIN 46) that is effective as of December, 2003.</p>
