Western Public Agencies Group (WPAG):

Please see the two questions below submitted on behalf of the Western Public Agencies Group (WPAG):

#1: Please provide a monthly breakdown of the misallocated amounts for FY02-FY18 including all of the modules for which adjustments are proposed (e.g. IPAC, Pay-Related, Corp AP, etc).

#2: What were the rate case impacts of the Total Cash Impact amounts for each rate case, i.e. what items in each rate case (such as reserves for settlement, reserves for risk, or other probability-adjusted rate setting based on business line reserve levels that resulted in higher power rates) were over-stated for Power and hence led to higher collection from Power Customers over this time period? What were the overcharge amounts to power customers from each rate case resulting from the misallocation? If there was no impact, please explain why or why not?

Thanks.

Steve Andersen
