Categorical Exclusion Determination
Bonneville Power Administration
Department of Energy

Proposed Action: Decatur Island Shoreline Stabilization Project

PP&A No.: 3675

Project Manager: Todd Nicholson – TELF-TPP-3

Location: San Juan County, Washington

Description of the Proposed Action: Bonneville Power Administration (BPA) proposes to stabilize the western shoreline of Decatur Island by installing approximately 140 cubic yards of riprap, enhancing the strength of the riprap already in place at this location. The riprap would be granitic rock 1-3 feet in diameter and each stone would be individually placed using an excavator. Riprap placement is needed to stop rapid erosion and failure of slope where cables transition from above-ground to submarine on the west side of the island.

Findings: In accordance with Section 1021.410(b) of the Department of Energy's (DOE) National Environmental Policy Act (NEPA) Regulations (57 FR 15144, Apr. 24, 1992, as amended at 61 FR 36221-36243, July 9, 1996; 61 FR 64608, Dec. 6, 1996, 76 FR 63764, Nov. 14, 2011), BPA has determined that the proposed action:

1. fits within a class of actions listed in Appendix B of 10 CFR 1021, Subpart D (see attached Environmental Checklist);
2. does not present any extraordinary circumstances that may affect the significance of the environmental effects of the proposal; and
3. has not been segmented to meet the definition of a categorical exclusion.

Based on these determinations, BPA finds that the proposed action is categorically excluded from further NEPA review.

Attachment(s): Environmental Checklist
Categorical Exclusion Environmental Checklist

This checklist documents environmental considerations for the proposed project and explains why the project would not have the potential to cause significant impacts on environmentally sensitive resources and would meet other integral elements of the applied categorical exclusion.

Proposed Action: Decatur Island Shoreline Stabilization Project

Project Site Description

The proposed project is located on Decatur Island in San Juan County, Washington in the BPA Covington District. The work would be performed within a BPA easement on privately-owned land in the 7th mile the Fidalgo-Lopez Island No. 3 and No. 5 lines, specifically where the lines transition from above-ground to submarine. Work will take place at the shoreline of the island, above the mean higher high water mark.

<td>1. Historic and Cultural Resources</td>
<td>☑️</td>
<td>✔️</td>
</tr>
<tr>
<td>Explanation: A cultural site was documented during the review and survey process of the work area. BPA has determined that project activity would have no adverse effect on cultural resources, with the stipulation for archaeological monitoring. BPA will have a cultural monitor on-site throughout the project. The Washington Department of Archaeology &amp; Historic Preservation issued a letter of concurrence with BPA findings on April 4, 2017. In the event that archaeological or historic materials are discovered during project activities, work in the immediate vicinity must stop, the area secured, and the concerned tribe’s cultural staff and cultural committee notified.</td>

potential impacts from sediment are mitigated.

6. **Wetlands**

   **Explanation:** There are no wetlands within the project area.

7. **Groundwater and Aquifers**

   **Explanation:** Spill prevention measures would be utilized during construction activities. The project would not provide a pathway for groundwater contamination.

8. **Land Use and Specially Designated Areas**

   **Explanation:** No change in land use would occur and project activities would not impact land use.

9. **Visual Quality**

   **Explanation:** There would be no change to the visual quality of the area as a result of the proposed activities.

10. **Air Quality**

    **Explanation:** The project would have no significant impacts on air quality; however, a small amount of vehicle emissions and dust may occur during construction.

11. **Noise**

    **Explanation:** Some temporary construction noise would occur during daylight hours. The operational noise of the transmission line would not change.

12. **Human Health and Safety**

    **Explanation:** During project activity, all standard safety protocols would be followed. Project activities would not impact human health or safety.

### Evaluation of Other Integral Elements

The proposed project would also meet conditions that are integral elements of the categorical exclusion. The project would not:

- **Threaten a violation of applicable statutory, regulatory, or permit requirements for environment, safety, and health, or similar requirements of DOE or Executive Orders.**

  **Explanation, if necessary:** NA

- **Require siting and construction or major expansion of waste storage, disposal, recovery, or treatment facilities (including incinerators) that are not otherwise categorically excluded.**

  **Explanation, if necessary:** NA

- **Disturb hazardous substances, pollutants, contaminants, or CERCLA excluded petroleum and natural gas**
products that preexist in the environment such that there would be uncontrolled or unpermitted releases.

| Explanation, if necessary: NA |

✅ Involve genetically engineered organisms, synthetic biology, governmentally designated noxious weeds, or invasive species, unless the proposed activity would be contained or confined in a manner designed and operated to prevent unauthorized release into the environment and conducted in accordance with applicable requirements, such as those of the Department of Agriculture, the Environmental Protection Agency, and the National Institutes of Health.

| Explanation, if necessary: NA |

---

**Landowner Notification, Involvement, or Coordination**

Description: All activities would be coordinated with landowners prior to beginning work.

---

Based on the foregoing, this proposed project does not have the potential to cause significant impacts on any environmentally sensitive resources.
