Proposed Action: BPA Equipment Transfer within Idaho Power Company’s Mountain Home Substation

Project Manager: Jay Largo, TPCV-TPP-4

Location: Elmore County, Idaho

Categorical Exclusion Applied (from Subpart D, 10 C.F.R. Part 1021): B1.24 Property Transfers

Description of the Proposed Action: BPA proposes to transfer ownership of one 138-kV power circuit breaker and its associated relays to Idaho Power Company (IPC). The circuit breaker and its relays are located within IPC’s Mountain Home Substation adjacent to BPA’s Mountain Home Substation. No ground disturbing activity would occur.

Findings: In accordance with Section 1021.410(b) of the Department of Energy’s (DOE) National Environmental Policy Act (NEPA) Regulations (57 FR 15144, Apr. 24, 1992, as amended at 61 FR 36221-36243, July 9, 1996; 61 FR 64608, Dec. 6, 1996, 76 FR 63764, Nov. 14, 2011), BPA has determined that the proposed action:

1. fits within a class of actions listed in Appendix B of 10 CFR 1021, Subpart D (see attached Environmental Checklist);
2. does not present any extraordinary circumstances that may affect the significance of the environmental effects of the proposal; and
3. has not been segmented to meet the definition of a categorical exclusion.

Based on these determinations, BPA finds that the proposed action is categorically excluded from further NEPA review.

Attachment(s): Environmental Checklist
Categorical Exclusion Environmental Checklist

This checklist documents environmental considerations for the proposed project and explains why the project would not have the potential to cause significant impacts on environmentally sensitive resources and would meet other integral elements of the applied categorical exclusion.

**Proposed Action:** BPA Equipment Transfer within Idaho Power Company’s Mountain Home Substation

**Project Site Description**

IPC’s Canby Substation is located adjacent to BPA’s Mountain Home Substation on land disturbed during the original substation construction. Topography is flat with vegetation consisting of shrub-steppe species. Bureau of Land Management range land surrounds both substations. High voltage transmission lines cross adjacent to and within the two substations.

**Evaluation of Potential Impacts to Environmental Resources**

| **Explanation:** No impact to the existing look of the substation.
10. **Air Quality**

   **Explaination:** No ground disturbance would occur.

11. **Noise**

   **Explaination:** No increases in ambient noise levels in the project area would occur.

12. **Human Health and Safety**

   **Explaination:** None present.

### Evaluation of Other Integral Elements

The proposed project would also meet conditions that are integral elements of the categorical exclusion. The project would not:

- **Threaten a violation of applicable statutory, regulatory, or permit requirements for environment, safety, and health, or similar requirements of DOE or Executive Orders.**
  - **Explanation, if necessary:**

- **Require siting and construction or major expansion of waste storage, disposal, recovery, or treatment facilities (including incinerators) that are not otherwise categorically excluded.**
  - **Explanation, if necessary:**

- **Disturb hazardous substances, pollutants, contaminants, or CERCLA excluded petroleum and natural gas products that preexist in the environment such that there would be uncontrolled or unpermitted releases.**
  - **Explanation, if necessary:**

- **Involve genetically engineered organisms, synthetic biology, governmentally designated noxious weeds, or invasive species, unless the proposed activity would be contained or confined in a manner designed and operated to prevent unauthorized release into the environment and conducted in accordance with applicable requirements, such as those of the Department of Agriculture, the Environmental Protection Agency, and the National Institutes of Health.**
  - **Explanation, if necessary:**

### Landowner Notification, Involvement, or Coordination

**Description:** None necessary because the project is located within IPC’s Mountain Home Substation.

Based on the foregoing, this proposed project does not have the potential to cause significant impacts to any environmentally sensitive resource.
