**Proposed Action:** Hardeon Battery Generator Integration

**Project Manager:** Toni Timberman, TSE-TPP-2

**Location:** Everett, Snohomish County, Washington

**Categorical Exclusion Applied (from Subpart D, 10 C.F.R. Part 1021):** B4.11 Electric power substations and interconnection facilities

**Description of the Proposed Action:** Bonneville Power Administration (BPA) proposes to integrate Snohomish Public Utility District’s (SnoPUD) 1-megawatt Hardeon battery generator expansion into BPA’s balancing authority area in response to a SnoPUD small generator interconnection request. BPA and SnoPUD would enter into a generation integration construction agreement that would memorialize the parties’ responsibilities; the agreement would amend an existing 2014 1-megawatt generation integration agreement for the first phase of the Hardeon Battery Storage Project.

The point of interconnection would be at SnoPUD’s existing Hardeon Substation, existing equipment and metering would be used, and no ground disturbance or substation structural modifications would be required.

**Findings:** In accordance with Section 1021.410(b) of the Department of Energy’s (DOE) National Environmental Policy Act (NEPA) Regulations (57 FR 15144, Apr. 24, 1992, as amended at 61 FR 36221-36243, July 9, 1996; 61 FR 64608, Dec. 6, 1996, 76 FR 63764, Nov. 14, 2011), BPA has determined that the proposed action:

1. fits within a class of actions listed in Appendix B of 10 CFR 1021, Subpart D (see attached Environmental Checklist);
2. does not present any extraordinary circumstances that may affect the significance of the environmental effects of the proposal; and
3. has not been segmented to meet the definition of a categorical exclusion.
Based on these determinations, BPA finds that the proposed action is categorically excluded from further NEPA review.

Attachment(s): Environmental Checklist
Categorical Exclusion Environmental Checklist

This checklist documents environmental considerations for the proposed project and explains why the project would not have the potential to cause significant impacts on environmentally sensitive resources and would meet other integral elements of the applied categorical exclusion.

**Proposed Action:** Hardeson Battery Generator Integration

**Project Site Description**

The proposed interconnection would occur at Snohomish Public Utility District’s existing Hardeson Substation.

**Evaluation of Potential Impacts to Environmental Resources**

6. **Wetlands**

   - **Explanation:** No ground disturbance or associated disturbance to wetlands would be required.

7. **Groundwater and Aquifers**

   - **Explanation:** No ground disturbance or associated disturbance to groundwater resources would be required.

8. **Land Use and Specially Designated Areas**

   - **Explanation:** Project would be located within an existing substation.

9. **Visual Quality**

   - **Explanation:** No ground disturbance or building modifications that would affect visual quality would be required.

10. **Air Quality**

    - **Explanation:** No ground disturbance that would produce dust or emission-producing equipment would be required.

11. **Noise**

    - **Explanation:** No ground disturbance or installation of new equipment that would produce noise would be required.

12. **Human Health and Safety**

    - **Explanation:** No ground disturbance that would disturb any unknown contamination would be required.

---

**Evaluation of Other Integral Elements**

The proposed project would also meet conditions that are integral elements of the categorical exclusion. The project would not:

- **☑** Threaten a violation of applicable statutory, regulatory, or permit requirements for environment, safety, and health, or similar requirements of DOE or Executive Orders.

  - **Explanation, if necessary:**

- **☑** Require siting and construction or major expansion of waste storage, disposal, recovery, or treatment facilities (including incinerators) that are not otherwise categorically excluded.

  - **Explanation, if necessary:**

- **☑** Disturb hazardous substances, pollutants, contaminants, or CERCLA excluded petroleum and natural gas products that preexist in the environment such that there would be uncontrolled or unpermitted releases.

  - **Explanation, if necessary:**
Involving genetically engineered organisms, synthetic biology, governmentally designated noxious weeds, or invasive species, unless the proposed activity would be contained or confined in a manner designed and operated to prevent unauthorized release into the environment and conducted in accordance with applicable requirements, such as those of the Department of Agriculture, the Environmental Protection Agency, and the National Institutes of Health.

Landowner Notification, Involvement, or Coordination

Description: Landowner, Snohomish PUD, would be conducting the work.

Based on the foregoing, this proposed project does not have the potential to cause significant impacts on any environmentally sensitive resources.
