Proposed by: Bonneville Power Administration (BPA)

Description of the Proposed Action: BPA proposes to perform routine road maintenance on about 900 feet of the BPA Hood River-Coop Service No. 1 12.5 kilovolt transmission line corridor in Hood River, Oregon. Land along the corridor consists of private agricultural properties.

The roadwork is needed to improve access for crews that will be maintaining the transmission line and towers within the transmission line corridor. All proposed work will occur within the existing road prisms and will not result in disturbance outside of previously disturbed roadbeds. No unauthorized construction activities will occur in any water body including streams, ponds, or wetlands.

The project includes but is not limited to:
- Reshaping, grading and compacting existing road surfaces and landing
- Hauling, placing, and shaping of crushed rock
- Constructing or reconditioning of water bars, drain dips and outlet ditches

Findings: BPA has determined that the proposed action complies with Section 1021.410 and Appendix B of Subpart D of the Department of Energy’s (DOE) National Environmental Policy Act (NEPA) Regulations (57 FR 15144, Apr. 24, 1992, as amended at 61 FR 36221-36243, July 9, 1996; 61 FR 64608, Dec. 6, 1996, 76 FR 63764, Nov. 14, 2011). The proposed action does not present any extraordinary circumstances that may affect the significance of the environmental effects of the proposal. The proposal is not connected [40 C.F.R. 1508.25(a)(1)]
to other actions with potentially significant impacts, has not been segmented to meet the
definition of a categorical exclusion, is not related to other proposed actions with cumulatively
significant impacts [40 C.F.R. 1508.25(a)(2)], and is not precluded by 40 C.F.R. 1506.1 or
10 C.F.R. 1021.211. Moreover, the proposed action would not (i) threaten a violation of
applicable statutory, regulatory, or permit requirements for environment, safety, and health,
(ii) require siting and construction or major expansion of waste storage, disposal, recovery, or
treatment facilities, (iii) disturb hazardous substances, pollutants, contaminants, or
Comprehensive Environmental Response, Compensation and Liability Act-excluded petroleum
and natural gas products that pre-exist in the environment such that there would be uncontrolled
or unpermitted releases, (iv) have the potential to cause significant impacts on environmentally
sensitive resources, or (v) involve genetically engineered organisms, synthetic biology,
governmentally designated noxious weeds, or invasive species, unless the proposed activity
would be contained or confined in a manner designed and operated to prevent unauthorized
release into the environment and conducted in accordance with applicable requirements.

This proposed action meets the requirements for the Categorical Exclusion referenced above.
We therefore determine that the proposed action may be categorically excluded from further
NEPA review and documentation.

Environmental Checklist for Categorical Exclusions

Name of Proposed Project: Hood River-Coop Service No. 1 Transmission line Road Maintenance

Work Order #: 319560

This project does not have the potential to cause significant impacts on the following environmentally sensitive resources. See 10 CFR 1021, Subpart D, Appendix B for complete descriptions of the resources. This checklist is to be used as a summary – further discussion may be included in the Categorical Exclusion Memorandum.
