Posted January 19, 2017

Powerex appreciates the opportunity to comment on BPA's framework for a Coordinated Transmission Agreement (CTA) between BPA and the EIM market operator, CAISO.

Powerex understands that the draft CTA is a seams agreement between BPA and the CAISO intended to enable EIM related flows on BPA's transmission system while at the same time protecting the reliability of BPA's grid. While Powerex has no specific comments on the content of the CTA at this time, as a major Southern Intertie customer, Powerex is interested in further engagement on this topic. Powerex would appreciate being involved in any future discussions on the development of the CTA, and encourages BPA to hold a public workshop process to facilitate stakeholder input.

Regards,

Raj Hundal  
Market Policy & Practices Manager
