Generator Interconnection Reform Proposal Comments

NRU and PNGC Power

Geoff Carr

Date: October 5, 2012

Subject: SGIP Reform Proposal

NRU and PNGC Power support the direction being taken by BPA staff under the Small Generator Interconnection Procedure Reform. Of particular interest to us are the process and timeline flexibilities and low study deposits associated with the SGIP. Alignment of the SGIP with LGIP in terms of Site permit milestone (as applicable), Parking Lot, Pro Rata cost allocation and the Suspension provision is appropriate. We look forward to working with BPA on tariff language in the near future.
